

Summary of Feedback

10 Feb 2022

- The website (Search engine, features etc.) should be easy to be used by everyone with different backgrounds and experience levels.
- As a volunteer organization, it is not the website intention to make any competition therefore any use of comparison charts or graphs should be avoided.
- The focus should only be Saskatchewan, not entire Canada.
- Putting comments for the audience is a very interesting idea.
- Having status is a very good idea because it might take 4/5 years for a project to get the result.
- "Award Ceremony" should be listed on the profile /project list.
- It's a good idea to have a schedule calendar on the home page and each project has its schedule.
- There are 20-25 projects every year, any of the projects can be used or just a year or a couple of years or a subject project could be picked and see how it looks like in different years.
- As a volunteer organization, there is no one to monitor the virtual chat box. Instead of having a virtual chat box, viewers can put their information contact on the comment box. Sometimes a comment box may work. Providing information is a little bit better than having a live chat.
- Making a video for each project is not a good idea. Put a link for that instead of many videos on the site.
- "Subject matter and experts ": This might be something good to be used for the next phase not for now and as it is used for collaboration it might be a better idea to put it in a collaborate tab.
- It should be avoided to put a lot of details on the home page.
- For displaying it is better not to put information in a box or a frame.
- Put an option for "Unknown" in virtual chat because you have no idea about which coordinator can help.
